The has published the 33 papers in various field of forensic science including medical, dental and paramedical as well as examination of sequence of stroke in questioned document examination. There are constant changes in the society which have positive as well as negative impacts on the many folds in our surrounding. They deeply examine and study the cases by utilizing novel scientific techniques with references of all previous cases. They do so in such a way that next time a similar case is found can be solved faster.

The importance of opinion expressed in any case examined by trained, knowledgeable and skilled expert are only valid when the scientific evidences are acknowledged by the court. In taking judicious decision, the opinion is interpreted by the judicial officer for understanding the consequences of the criminal incidents occurred. In addition to theoretical knowledge, an intensive training and practice in all the area of forensic science is required by looking at the growing market of criminal activities.

During recent years, the shift and change in the financial transaction methods by mean of digital technology has been witnessed and the increased need of seconds of money transaction has also increase the cases of financial fraud and financial crime which is a major challenge in upcoming time. I am satisfied to report that, all issues of Volume 7 were distributed online well within the time during the

year 2022. This International Journal of Forensic Medicine and Toxicological Science is peer-reviewed Journal which has published the research article of case investigation and analysis related to forensic and medical sciences.

I am satisfied to report that, all issues of Volume 7 were distributed online well within the time during the year 2022.
